

A Unified Solution for Modern Logistics Operations

Built on Salesforce.
Integrated by design.
Ready for growth.

Revenova TMS and Accounting Seed deliver a fully connected operations and finance experience without the need for bolt-on tools or complex integrations. Because both solutions are native to the Salesforce platform, logistics companies get real-time visibility, faster workflows, and data consistency across transportation, finance, and business intelligence.

Why Finance Teams Love This Solution

- 1. Faster Invoice Cycles:** Automatically generate customer and carrier invoices from shipment or load events inside Revenova TMS.
- 2. Real-Time Financial Visibility:** Revenue, cost, and margin data flow seamlessly into Accounting Seed—no rekeying, no waiting for batch exports.
- 3. Stronger Cash Flow Control:** Track receivables, payables, and settlements in one platform, with robust tools for collections, disbursements, and reconciliation.
- 4. Built-in Audit Trails and Compliance:** Ensure accuracy and auditability with consistent source-of-truth data across both operations and accounting.
- 5. Global-Ready:** Multicurrency, tax-compliant workflows support global business and cross-border financial complexity.
- 6. Dynamic Reports and Dashboards:** Keep track of both operational and financial metrics simultaneously with custom visualizations.

A Single Platform for TMS + Finance

With both Revenova TMS and Accounting Seed built on Salesforce, you can:

- ✂ Centralize data across teams
- ✂ Customize workflows without code
- 🔄 Extend reporting and automation using Salesforce tools
- 🔒 Eliminate disconnected spreadsheets and reduce risk

No integrations to build. No information gaps. Just better decisions faster.
